Flat Face

No.1566 Pick & Finishing Hammer

39mm Crowned face with round point pick head to remove low spots when metal inishing. Polished heads. High grade 1078 steel with American Hickory handle.

Head weight: 260g
Length: 13"(330mm)

No.1568 (Flat Faces) Light Planishing Hammer

No.1562 (Crown Faces) Light Planishing Hammer

30mm Round & 28mm Square bumping hammer, polished striking heads. High grade 1078 steel with American Hickory handle.

Head weight: 225g **Length:** 13"(330mm)

No.1560 (Flat Faces) Standard Planishing Hammer

No.1561 (Crown Faces) Standard Planishing Hammer

40mm Round & 38mm Square bumping hammer, polished striking heads and cheeks. High grade 1078 steel, Hickory handle.

Head weight: 320g **Length:** 13"(330mm)

No.1570 Fender Bumping Hammer

Fender bumping hammer has extra long reach with a curved head for reaching into areas where direct access is impossible using a standard panel beating hammer.

High grade 1078 steel, Hickory handle.
Head weight: 980g **Length:** 8.1/4"(209mm)

No.1547
Angle Dolly

Made from drop forged high grade 1078 carbon steel. Heat treated, ground painted and polished to a high standard of surface finish.

Weight: 630g
Length: 4.3/8"(110mm)

No.1548
Thin Toe Dolly

Made from drop forged high grade 1078 carbon steel. Heat treated, ground painted and polished to a high standard of surface finish.

Weight: 1070g
Length: 4.5/8"(120mm)

No.1550
Grid Dolly

Made from drop forged high grade 1078 carbon steel. Heat treated, ground painted and polished to a high standard of surface finish.

Weight: 1070g
Length: 4.5/8"(120mm)

No.1533
Thick Toe Dolly

Made from drop forged high grade 1078 carbon steel. Heat treated, ground painted and polished to a high standard of surface finish.

Weight: 1340g
Length: 4.3/4"(120mm)

No.1532
Shrinking Toe Dolly

Made from drop forged high grade 1078 carbon steel. Heat treated, ground painted and polished to a high standard of surface finish.

Weight: 1280g
Length: 4.3/4"(120mm)

No.1554
Heel Dolly

Made from drop forged high grade 1078 carbon steel. Heat treated, ground painted and polished to a high standard of surface finish.

Weight: 895g
Length: 3.1/4"(80mm)

No.1552
Utility Dolly

Made from drop forged high grade 1078 carbon steel. Heat treated, ground painted and polished to a high standard of surface finish.

Weight: 1300g
Length: 2.1/2"(65mm)

No.1553
Curved Dolly

Made from drop forged high grade 1078 carbon steel. Heat treated, ground painted and polished to a high standard of surface finish.

Weight: 1160g
Length: 5.1/4"(130mm)

No.1551
Double End Hand Dolly

Made from drop forged high grade 1078 carbon steel. Heat treated, ground painted and polished to a high standard of surface finish.

Weight: 1170g
Length: 3"(75mm)

No.1549
Reverse Curve Dolly

Made from drop forged high grade 1078 carbon steel. Heat treated, ground painted and polished to a high standard of surface finish.

Weight: 1540g
Length: 2.3/4" (70mm)

No.1545
Offset Round Dolly

Made from drop forged high grade 1078 carbon steel. Heat treated, ground painted and polished to a high standard of surface finish.

Weight: 1440g
Length: 2.3/8" (60mm)

No.1544
Round & Pein Dolly

Made from drop forged high grade 1078 carbon steel. Heat treated, ground painted and polished to a high standard of surface finish.

Weight: 720g
Length: 5" (125mm)

No.1541
Large End Dolly

Made from drop forged high grade 1078 carbon steel. Heat treated, ground painted and polished to a high standard of surface finish.

Weight: 1400g
Length: 5" (125mm)

No.1542
Double End Round Dolly

Made from drop forged high grade 1078 carbon steel. Heat treated, ground painted and polished to a high standard of surface finish.

Weight: 1400g
Length: 4" (105mm)

No.1555
Rubber Heel Dolly

Prevents stretching of metals

This rubber heel dolly works well in sharp corners & wide radii. Also works well on new and lighter sheet metal panels. The weighted hard rubber coating provides a cushioning effect to match the weight of the hammer without stretching.

Length: 2.9/16" (65mm)
Weight: 460g

Tough nylon material

No.1557
Bolster Head Nylon Dolly

Tough nylon material with long handle and 95mm straight blade chisel head with chamfer on edge, can reach into narrow openings to reform damaged panels.

Head: 3.1/2" (95mm)
Length: 11" (280mm)

Tough nylon material

No.1559
Double End Nylon Dolly

Tough nylon material with one end having a 70mm diameter round convex head while the other has a 65mm wide curved wedge shaped head. Ideal for working on lighter sheet metal panels as the material provides a cushioning effect to match the weight of the hammer without stretching.

Round End: 2.3/4" (70mm)
Wedge End: 2.1/2" (65mm)
Length: 7" (180mm)

Tough nylon material

No.1556
Round Head Chisel Nylon Dolly

Tough nylon material with long handle and 95mm diameter half round head with chamfer on edge, can reach into narrow openings to reform damaged panels.

Head: 3.1/2" (95mm)
Length: 11" (280mm)

No.1567

7Pc. Rubber Dolly Set

These rubber dollies work well in sharp corners & wide radii. Also works well on new and lighter sheet metal panels. The weighted hard rubber coating provides a cushioning effect to match the weight of the hammer without stretching. **Set Contains:**
Drip Rail Dolly

Length: 9.1/2" (240mm) **Weight:** 880gm

Utility Dolly

Length: 2.3/4" (70mm) **Weight:** 960gm

Double End Hand Dolly

Length: 2.3/4" (70mm) **Weight:** 840gm

Double End Hand Dolly

Length: 6.3/4" (175mm) **Weight:** 1580gm

Curved Dolly

Length: 5.1/2" (140mm) **Weight:** 940gm

Toe Dolly

Length: 4.3/4" (120mm) **Weight:** 620gm

Heel Dolly

Length: 2.1/2" (65mm) **Weight:** 360gm

**Prevents
stretching of
metal panels**

No.1558

2Pc. Rubber Heel & Toe Dolly Set

Heel & toe rubber dolly set works well on sharp corners & wide radii.

They also work well on new and lighter sheet metal panels.

The weighted hard rubber coating provides a cushioning effect to match the weight of the hammer without stretching.

Heel Dolly Dimensions: 65 x 75mm

Toe Dolly Dimensions: 125 x 75mm

Weight: Heel: 460g Toe: 700g

No.4700

9PC Heavy-Duty Body Pry & Spoon Bar Set

Set consist of nine individual panel spoons, bars and dollies for working and levering body panel and parts. Made from heat treated alloy steel to withstand heavy usage.

Set contains:

Part No.	Description	Length
4700A	Double End Spoon Bar	915mm
4700B	Double End Spoon Bar	790mm
4700C	Double End Spoon Bar	580mm
4700D	Double End Spoon Bar	480mm
4700E	Offset Spoon	470mm
4700F	Offset Spoon	450mm
4700G	Offset Spoon	330mm
4700H	T Shape Spoon	140mm
4700J	L Shape Spoon	130mm

No.1598

Panel Beating Bumping File (Fine)

Bumping files often referred to as Slappers. Ideal for panel beating on flat panels without stretching the metal. The grain of the file surface works as a shrinking hammer

Length: 12.1/2" (320mm)

No.1599

Panel Beating Bumping File (Coarse)

Bumping files often referred to as Slappers. Ideal for panel beating on flat panels without stretching the metal. The grain of the file surface works as a shrinking hammer.

Length: 12.1/2" (320mm)

**No.1534
Flat Wide Spoon**

General purpose flat wide spoon with polished head and polished edges. Made from high grade 1078 carbon steel, head treated with satin chrome finish.

Length: 11.3/8"(290mm)

**No.1531
Drip Moulding Spoon**

General purpose spoon shaped to fit drip moulds. Polished head and polished edges. Made from high grade 1078 carbon steel, head treated with satin chrome finish.

Length: 9.1/4"(235mm)

**No.1540
Flat Thin Spoon**

Light and thin long tapered spoon with polished head and polished edges. Made from high grade 1078 carbon steel, head treated with satin chrome finish.

Length: 10.1/4"(260mm)

**No.1536
Double Blade Spoon (Narrow Curve)**

General purpose double ended spoon with polished head and polished edges. Made from high grade 1078 carbon steel, head treated with satin chrome finish.

Length: 20"(510mm)

**No.1538
Double Blade Spoon (Wide Curve)**

General purpose double ended spoon with polished head and polished edges. Made from high grade 1078 carbon steel, head treated with satin chrome finish.

Length: 16.1/2"(420mm)

**No.1543
Light Dinging Spoon**

Light and thin dinging spoon with polished head and polished edges. Made from high grade 1078 carbon steel, head treated with blue painted finish.

Length: 10"(255mm)

No.1571 (Without Blade)
Adjustable Body File Holder

No.1574 (With Blade)
Adjustable Body File Holder

Holder adjusts to flex the blade to either concave or convex configuration to conform to body shape. All metal construction.
Length: 14"(355mm)

No.1573 (8 TPI)
Flexible Body File Blade

Use for filing & cutting steel and plastic surfaces. 14" x 8tpi Body file blade.

No.1573-F (12 TPI)
Flexible Body File Blade

Use for filing & cutting steel and plastic surfaces. 14" x 12tpi Body file blade.

No.1580
Hand Sander

15.3/4" x 2.1/2"(400 x 65mm) Wooden handle flat hand sander for trueing flat surfaces.
Uses 17" x 2.3/4"(430 x 70mm) Abrasive paper.

No.1589
Hand Sander Low Profile 2.3/4"-11"

11" x 2.3/4"(280 x 70mm) Wooden handle low profile flat hand sander for trueing flat surfaces.
Uses 17" x 2.3/4"(430 x 70mm) Abrasive paper.

No.1811
Lightweight Sanding Block

This lightweight sanding block's body is constructed from durable ABS plastic with moulded comfort-grip hand grips. Features rubber foam pad with heavy spring lock retaining clips to hold sanding paper securely.

Size: 6.1/4" x 8.1/4"(160 x 210mm) **Weight:** 10oz(290gm)

No.1816
Double Density Sanding Block

Use for wet or dry sanding applications. Grey side is soft & pliable for sanding irregular surfaces.

Black side is stiff for faster sanding on curved surfaces.

Overall Size: 2.1/2" x 5.5/8"(65 x 145mm)

No.1017
5" Tungsten Carbide Sanding Disc

Supplied with three metal backed carbide grit discs of different grades. The carbide coated metal pads will not clog when used on paint work or when used on a wet surface.

1/4" Arbor rubber backing disc included.

Three sanding discs included: Fine, medium & coarse grit.

Size: 5"(125mm) Diameter

No.1019
Tungsten Carbide Sanding Block Set

Supplied with three metal backed carbide grit discs of different grades. The carbide coated metal pads will not clog when used on paint work or when used on a wet surface.

Three sanding pads included: Fine, medium & coarse grit.

Size: 130 x 70mm

No.1010

Long Handle Clip Remover

This drop forged tool removes upholstery clips in hard to reach places where normal tools can not go. Can be used for a multitude of other uses where a long reach tool is required. **Length:** 20"(510mm)

Tough nylon material will not scratch surface

No.1012

Nylon Cap & Clip Removing Tool

Tough nylon jaws enable clip removal with out scratching or marking surface finish. Material is nylon and white in colour.

Length: 9.1/4"(235mm)

No.1822

For J-Clip Removal

Podney Pliers

Quickly removes J-Clips without damage to the panel or clips. Vinyl coated handles for comfortable use.

Length: 8"(200mm)

No.1823

Podney Knife

- "Two Fisted Knife" for removing body side moldings

The 4"(100mm) blade cuts under molding in either direction.

Angled handles for easy grip & positive control. Tempered steel blade can be sharpened with a hand file.

No.1112

GM-Holden Moulding Release Tool

Used for removal of windscreen moulding on rubberless installation for GM vehicles. Straight blades.

Length: 10.3/4"(245mm)

No.1113

Ford Moulding Release Tool

Used for removal of windscreen moulding on rubberless installation for Ford vehicles. Bent blades.

Length 10.3/4"(245mm)

No.903

Straight Hog Ring Pliers

Ideal for installation of hog rings in seat interiors on most local and imported vehicles, including BMW, Mercedes Benz, VW etc. Cushion grip pliers are spring loaded to hold hog ring in jaws during use. Special notches along the plier jaws allows ring to fit and stay in place during operation while minimizing operator effort.

Length: 7"(180mm)

**Features 45°
offset nose**

No.904

Offset Hog Ring Pliers

Ideal for installation of hog rings in seat interiors on most local and imported vehicles, including BMW, Mercedes Benz, VW etc. Cushion grip pliers are spring loaded to hold hog ring in jaws during use. Special notches along the plier jaws allows ring to fit and stay in place during operation while minimizing operator effort.

Length: 7"(180mm)

No.1016

Offset Rivet Clip Removing Pliers

Designed for the removal of the rivet type plastic clips, used in and around the engine bay and interior linings. These inner pins when inserted expand the trim clip and it requires the tapered jaws and adjustable angled head of these pliers to grip and lift the centre rivet before extracting the clip.

Plier head has four position angle adjustment from 0° to 90°. **Length:** 9"(230mm)

No.1013

Positive Lift Action Clip Remover Pliers

Allows easy access and removal of those hard to reach clips on bumper covers, fender liners etc. Features positive lift action without damage to the clip or the surrounding area. Simply insert the jaws under the clip and squeeze the pliers to remove the clip.

Length: 9.1/2"(240mm)

No.1001

Upholstery Clip Remover

This drop forged tapered "V" opening tool removes upholstery clips from car doors. Fits many different sizes of clips. Can also be used for a multitude of other jobs.

Length: 8"(200mm)

No.1001-T

Upholstery Clip Remover

This drop forged stepped notched opening tool removes upholstery clips from car doors. Fits many different sizes of clips. Can also be used for a multitude of other jobs.

Length: 9.1/4"(235mm)

No.1002

Mini Upholstery Clip Remover

This drop forged tapered shaft tool removes mini upholstery clips from car doors, moulds etc.

Length: 8"(200mm)

No.1004

Door Handle Clip Remover

Quickly removes the door handle and window winder spring clips with a single push. When the clip is removed it stays in the handle for easy reinstallation. Works on both small & large clips.

Length: 7"(180mm)

No.1003

Upholstery Clip Remover

This tool will remove clips from car doors with ease. Fits many different size clips and can be used for many other prying purposes.

Length: 8"(200mm)

No.1005

Universal Clip Remover

The special bevelled pry surfaces allow easy removal of large and small imbedded clips from a wide variety of locations on automotive car and truck bodies, including trim pad, body side moulding, door weather stripping and many other areas.

Length: 8"(200mm)

No.1006

Curve Shank Trim Remover Tool

V-notch groove removes door and body trim fasteners. Long curved neck supplies adequate leverage. This tool will remove the most difficult trim fasteners without damage to trim or body.

Length: 8"(200mm)

No.1008

10-in-1 Trim Tool

A very versatile tool that performs a multitude of tasks.

1. Moulding Remover - semi sharp bevelled edge for removing protector mouldings and badges held by double sided tape, without scratching. 2. Windscreen Wiper Wrench 3. Door Rubber Metal Clip Inserter 4. Door Weather Strip Clip Remover 5. Door Trim Bezel Clip Remover 6. Door Handle Clip Remover 7. Headlamp Spring Tool 8. Windscreen Moulding Clip Remover

No.1111

Universal Moulding Release Tool

Removes trim mouldings from around cemented windcreens and rear windows. Has bevelled tip for easy entry under moulding, works in both directions. Sturdy construction, will not twist when lifting clip.

Length: 6.1/2"(165mm)

No.1011

Double Ended Clip Remover

Allows easy access and removal of those hard to reach clips on bumper covers, fender liners etc. Features two different head positions to give a proper leverage to pull fasteners in confined areas.

Length: 9.1/2"(240mm)

Can be used for a multitude of different applications

No.1015

4Pc. Universal Clip Remover Set

The eight different shaped ends on these levers are made from tough and flexible polycarbonate. These tools have many prying and levering applications. They will not scratch or damage painted surfaces when prying clips or opening locked doors etc.

No.1025

6Pc. Mini Clip/Panel Remover Set

Six different shaped ends on these levers are made from tough and flexible polycarbonate. They will not scratch or damage painted surfaces when prying clips or opening locked doors etc.

No.1009

Forged Trim Clip Remover Pliers

This drop forged tapered "V" opening tool removes upholstery clips from car doors. Fits many different sizes of clips. Can also be used for a multitude of other jobs.

Length: 8"(200mm)

No.1022

2Pc. Clip Remover Set

These two piece drop forged tools with Straight and 90° openings. Removes upholstery clips from car doors. They fit many different sizes of clips. Can also be used for a multitude of other jobs.

Length: 8"(200mm)

No.1009SET

Clip Remover Plier Set 35°.& 80° Angles

These drop forged tapered "V" opening tools remove upholstery clips from car doors. Fits many different sizes of clips. Can also be used for a multitude of other jobs.

Length: 8"(200mm)

No.1965

E-Zee Strip Molding Tool

● Use with an air hammer

Removes adhesive body moldings quicker and easier than ever before. With proper use, the E-Zee Strip Tool removes moldings without body damage. US Patent #21541

No.1824

Emblem Remover

1.3/16"(30mm) Opening for removing emblems without damage. Saves expensive emblems and moldings and allows for easy reinstallation.

No.1026

Quick Clip Remover Pliers

Thin tapered jaws fit under the plastic rivet to remove inner door linings and other trim items that are held in place by these plastic rivets.

Length: 6"(150mm)

No.1575

Door Hinge Pin Removal Tool Set

Makes door removal a one man job. Contains all the necessary tools to easily remove the hinge pins from welded door hinges found on many late model cars. Also includes a door spring tool, used to remove and install door coil springs. Tool removes both solid and hollow hinge pins. Made from heat treated alloy steel. Full instructions included.

No.1595

9Pc. Door Hinge Remover & Installer Set

Set consist of three spline and four torx bits to fit most door hinges screws. The offset handle and ratchet wrench provide the torque to remove and replace these difficult fasteners.

Applicable for : VW, Audi, Seat, Skoda, Mercedes, Renault.

Bits size: M8, M10, M12 Spline, T30, T40, T45, T50 Torx

No.1588

Door Hinge "Pin Popper"

Removes door hinge pins fast. Drives out even stubborn hinge pins. With direct impact tap gently with a mallet to draw out the pin. Provides clearance for door panels and works on all GM cars with removable hinge pins. Includes PIN PULLER to remove loosened pins.

No.1587

Store / Door Hinge Aligning Bar

Finally a convenient door aligning tool saves space. Fits easily into your tool drawer. Uses your breaker bar for leverage. Save time. You won't have to hunt for the shop tool.

Length:

No.1577

Door Aligning Bar

The fastest means of aligning doors with welded hinges. Align doors with ease using force generated through leverage of tool. Will work on both conventional and welded hinges. Fits most cars and light trucks.

No.1585

Door Pin Extractor

For easy removal and replacement of door hinge pins. Choose the correct punch for the door hinge, remove the threaded end cap, slide the punch upwards through hinge and screw back the end cap. Fit the cranked handle onto the punch using the slotted end and tap gently with a mallet to draw out the pin.

Replacement Door Hinge Punches for #1585 Door Pin Extractor:

No.1581 3mm Door Hinge Punch

110mm long Replacement Door Hinge Punch for #1585 Door Pin Extractor.

No.1582 4mm Door Hinge Punch

110mm long Replacement Door Hinge Punch for #1585 Door Pin Extractor.

No.1583 5mm Door Hinge Punch

110mm long Replacement Door Hinge Punch for #1585 Door Pin Extractor.

Includes two headed pin adaptor, for both large and small latches.

No.1576

Door Hinge Adjuster

- Adjusts door hinges on most cars and light commercials

Adjust doors with either bolted or welded hinges. Simply slide pin end of tool into door latch, and close the door until the tool engages with the door striker. Raise or lower tool handle to align door.

No.1586

Universal Door Hold Jammer Tool

Holds door in the open position while you hammer, pull, grind, sand or paint. For door and deck lids. Tool is adjustable to hold the door open in any position and will attach to any size door latch.

No.1591

Door Hinge Slide Hammer Straightening Bar

Has both 90° and 180° hooks for engaging onto door hinges with 5lb. slide hammer for quickly straightening door hinges to the correct clearance and position. Made from chrome alloy steel. Satin chrome finish.

Length: 715 mm.

No.1578

Leverage Bar Body Straightener

Pull or push to straighten and align doors, door frames, fenders, bumpers, etc.

Fully adjustable for depth and height requirements.

Length: 42"(1070mm)

No.1572

GM Door Spring Remover / Installer Tool

Safest Tool Available for Coil Springs in GM Doors Compresses spring for easy, safe removal. Simply locate over spring and use a 1/2" wrench to compress the spring for removal and installation. Universal application.

No.1893

Inflatable Air Bag Door Wedge

The unique Inflatable air bag wedge allows you to safely separate the door frame from the vehicle body or separate the door panel and weatherstripping from the window to unlock the vehicle.

No.1592

Door Lock Reforming Tool

For the repair of damaged door lock apertures.

Suitable for flush fitting or recessed lock holes. Use with T-handle or with wrench on hexagon drive.

No.1835
Door Buzzer
Sanity Tool

Fits vehicle applications with door jamb buzzer switch located by door hinges. Eliminates irritating door buzzer sound when performing service on vehicle with door open and ignition switch "ON" Tool pushes on door jam switch and shuts buzzer "OFF". High tension spring keeps consistent pressure on door jam switch. Fluorescent flag reminds user to remove tool before closing the door.

For use with licenced technicians only

No.1821

Deluxe Lockout Tool Kit

This deluxe kit can unlock cars in a matter of seconds without damage, including cars with digital & electric locks. The kit covers over 100 makes and models of cars with a specific unlocking instruction book. Supplied in heavy duty canvas carry wallet.

For use with licenced technicians only

No.1812

Lockout Tool Kit

- **Unlocks over 98% of domestic and imported cars**
Unlocks cars in seconds without damage including cars with digital & electric locks. 15 Page instruction book lists over 100 makes and models of cars with specific unlocking instructions.

Suits Rocker Style Locks Found on Most GM and USA Manufactured Vehicles

No.1897

Security Lock Pick Set

Designed to be used by a professional trade person only. Pick ends are made from high quality spring steel. The rocker style picks include all configurations to unlock car door, fuel tank, ignition and steering locks etc.

For use with licenced technicians only

Complete Set to cover most European, Asian GM, Ford and Chrysler vehicles

No.1898

Security Lock Pick Set

Designed to be used by a professional trade person only. Pick ends are made from high quality spring steel. The rocker style picks include all configurations to unlock car door, fuel tank, ignition and steering locks etc. **Includes harpoon pick to remove broken keys from auto locks, Tension and gas cap pick tool.**

Perfect for paint-less body dent removal

No.1894

Inflatable Air Bag Body Dent Removers

These inflatable air bag dent removers use hand pumped air pressure to push out dents from the inside of door and fender panels. Two inflatable dent removers:
8" x 8" Square Inflatable Air Bag Dent Remover for removing dents in tight corners or along welded seams and panel edges.
14" x 8" Oblong Inflatable Air Bag Dent Remover for longer, larger, more accessible dents.
Perfect for paint-less body dent removal.
Universal applications for all automobiles, SUV's, and trucks.
Eliminate high points caused by body slide hammers and picks.
Pushes dents out to their normal shape avoiding excessive bog and sanding work. A real material and time saver.
Made from tough reinforced material for repeated use.

No.1834

Universal Rearview Mirror Bracket Lever

Many of today's vehicles have a rearview mirror that is attached to the mirror bracket by a spring clip.

Place the tool under the bottom edge of the windscreen where it attaches to the bracket and push the tool towards the glass.

This will pry the mirror up and off the bracket.

Length: 10.1/4"(260mm)

No.1836

Ford Rearview Mirror Removal Tool

Simply slide the blades of the tool between the bracket and the mirror. A gentle rocking motion with the tool, using an upward pressure will dislodge the mirror from the bracket.

Length: 8.1/4"(210mm)

No.1593

12Pc. Auto Door Lock Covers

12 Piece Set. Choose correct size lock cover and slip it over lock button. If cover is loose, as on some imports, masking tape may be applied inside cover for adhesion.

Save Time Masking!

No.1004B

Offset Universal Door Clip Remover

Quickly removes the door handle and window winder spring clips with a single push. When the clip is removed it stays in the handle for easy reinstallation.

Works on both small & large clips.

Length: 7"(180mm)

No.1882

Pneumatic Dent Puller

The pneumatic dent puller has 3lb. (1.36kg.) slide hammer and is fitted with a brass shut off valve. It is supplied with three different size screw on suction pads. Simply select the correct size pad to remove the dent apply shop air and use the slide hammer.

Compressed air is exhausted through the handle and unit is fitted with 13"(330mm) inlet hose with 1/4" NPT air plug.

Pad sizes:

- 1: 60mm screw on suction pad
- 2: 120mm screw on suction pad
- 3: 150mm screw on suction pad

This items are white in colour

No.1020

3Pc. Utility Wedge Set

Made from tough nylon to prevent scratching or marking surface finish.

Long Tapered Wedge: 29mm width x190mm long T

Tapered Wedge & Upholstery Clip Remover: 21mm width x265mm long. Long & Wide Tapered Wedge: 60mm width x197mm long

This item is white in colour

No.1021

Tapered Utility Wedge

Made from tough nylon to prevent scratching or marking surface finish. The curved angle allows to get around door jams & rubber seals. 25mm width x 197mm long.

No.1118

Window Moulding Removing Tool

Tool removes window moulding clips found on GM, Ford etc. Just place the jaw flat against the glass, locate clips and roll them out with the tip, keeping jaw flat to the glass. Double sided tips with different depths.

Overall Length 24"(610mm)

Windscreen Urethane Cutting Knives

Heavy-duty urethane cutting knives have replacement blades that can be stored in the handle. They are made from light weight aluminium with a steel retaining block to hold the blade in place. Cutting knives use standard utility trimming knife blades T&E No.7969.

Part No.	Description	Length
1845	9" Windscreen Urethane Cutting Knife	9"(230mm)
1846	18" Windscreen Urethane Cutting Knife	18"(460mm)
1847	24" Windscreen Urethane Cutting Knife	24"(610mm)

Replacement Blades: No.7969 Trimming Knife Blades (10 Blades)
No.7969-50 Trimming Knife Blades (50 Blades)

Smooth cut
stainless steel wire

No.1403

Windscreen Cut-Out Wire

Designed to provide fast cutting action. Each wire acts like a cutting saw tooth. Made from stainless steel wire.

Length: 164ft (50m)

No.1402 Windscreen Cut-Out Wire

Same stainless steel windscreen cut-out wire as #1403 except for length.

Length: 50ft (15.25m)

No.1843

Windscreen Removal Tool Set

Stainless steel wire is designed to provide fast cutting action on windscreen urethane sealant. The wire starter is a hollow stainless steel tube to feed the wire into the urethane. The tube is then removed leaving the wire inserted. Two pull grip handles are included.

No.1401

Braided Wire

Replacement Braided copper coated stainless steel Wire for use with #1843 Windscreen Removal Tool Set.

Length: 50ft(15m)

No.1809

Windscreen Cleaning Tool

This 3-in-1 tool performs the following:

1. Scraper with plastic razor blade.
2. Slide out needle for cleaning washer nozzles
3. Wiper rubber abrasive cleaner

Simply rub over to enhance wiper performance.

No.1125

Weather Stripping Tool

This tool provides a fast and efficient way to lift rubber weather stripping up and around windows. The handle has a taper that you can use to tilt the weather strip for easy insertion of cord. Instructions included.

No.1841

Windscreen Wire Starter Feeder

This flexible tempered spring steel blade with a slot cut into the tip pushes the cutting wire below the dashboard deep into the urethane. This enables the user to start feeding the wire through the top and bottom in the centre of the windscreen before cutting towards each side.

Length: 16"(405mm)

No.1842

Windscreen Wire Starting Tool

The wire guide's long, narrow shaft protects the dash and interior mouldings from being damaged, Run the wire through the hole at the end of the tool, then with the wire on the round side of the tool attach the end of the wire in the hole midway up the tool, locking it in place with the set screw. Move the tool on the inside of the moulding a few inches at a time while another person on the outside follows through doing the cutting.

No.1830

Caulk Gutter Tool

The blade is sharpened on the end and both sides to cut through sealant and remove broken glass from window channels and gutters. Use the tool with the blade pulling towards you to clean out old sealant and glass in one motion.

Length: 9.1/2"(240mm)

24"(600mm) Long Shaft

No.1832

24" Glass Run Channel Cleaning Tool

The special ball shaped tip removes the broken pieces of tempered glass from the run channel on doors, windscreens etc. Without this tool it is almost impossible to remove all the stubbornly wedged pieces of glass. Tool has a 45°Tip and is 24"(600mm) Long

No.1831

2Pc. Glass Run Channel Cleaning Set

The special ball shaped tips remove the broken pieces of tempered glass from the run channel on doors, windscreens etc. Without this tool set it is almost impossible to remove all the stubbornly wedged pieces of glass. One with 45°Tip 10"(250mm) Long. One with 90°Tip 13"(330mm)Long.

No.1114

Windscreen Removal Tool

The easiest and proven method of removing windscreens. A strong tempered blade combined with cable pull handle assures the easiest and fastest way of cutting the caulking compound around the glass. Blade can be resharpened and/or replaced.

1114-2 Replacement Blade #1114

No.1115

Windscreen Removal Tool Set

This set consists of the following:

- A. Braided wire (3 strand)
- B. Wire gripping handles x 2
- C. Windscreen removal tool - cuts the adhesive around the screen.
- D. Wire feeder tool - designed for easy and flexible insertion of wire through polyurethane, allowing speedy removal of bonded windscreen.
- E. Trim pad remover #1115.
- F. Wind shield molding release tool.

1116 Replacement Wire #1115 Kit

No.1120

Windscreen Installation Set

This set consists of the following:

- A: Rope Insertion Tool; use this tool to insert rope into rubber gaskets. The handle feeds the rope through its stem as you pull it around the gasket.
- B: Locking Strip Insert Tool; inserts locking strip into windscreen seal.
- C: Curved Hook Tool; for inserting and cleaning rubber gaskets.
- D: Straight Hook Tool; for inserting and cleaning rubbergaskets.
- E: Cleaning Tool; for removal of broken glass from the siderunners whilst still in position.

No.1127

Windscreen Wiper arm Remover Pliers

Vinyl coating on lower jaw protects paintwork. Upper jaw fits neatly under wiper arm to provide leverage.

Length: 9" (230mm)

No.1744

Windscreen Washer Tool

Handy double ended tool with pocket clip and screw on safety caps. One end has a cleaner needle to correct spray pattern, the other end to adjust the windscreen washer jet to the correct spray direction. All steel construction.

Length: 6.3/4"(170mm)

No.1833

Universal Windscreen Wiper Arm Lever

The wide end of this tool has a concaved lip to work on the older style wiper posts. The narrow end is designed for use on later model vehicles. It has a long lip that allows you to put pressure on the tip and the sides of the wiper arm to easily release the arms from the post without damage to the vehicle.

Length: 7"(175mm)

No.1126 Forged Windshield Wiper Puller

The Wiper Puller is specially designed for use to remove the rear wiper arms with water jets included in the spindle of motorcars.

For use with Skoda, Audi, Seat, VW and others.

Always loosen the nut from the wiper arm BUT never totally remove the nut. Removal of the nut may cause damage to the plastic arm of metal ferrule (where fitted). Locate the hole of the bolt over the spindle. Place the jaws of the tool under the wiper arm at the base of the spindle. Tighten with fingers first.

Use 3/8" drive ratchet to 'dis-engage' arm from spindle. Lubrication maybe required.

No.1109

Quick Release Windscreen Cut Out Tool Set

Professional cut out knife with quick release button enables you to change blades in only two seconds. Supplied with three 90° cutting blades: 20mm, 28mm and 40mm. Also includes three flat cutting blades: 12mm, 16mm and 20mm.

**Quick Release
Button**

**Working
Surface**

No.1023

1/2"Drive Stripper Disc Set

1/2"Drive Stripper Disc fit onto your impact wrench and provide a quick method for removing paint, rust and undercoat from panels and metal surfaces. Supplied as a set of two:

1: 65mm diameter x 1/2"Drive Disc

2: 105mm diameter x 1/2"Drive Disc

**Super thin jaws with swivel ball cap
makes for a great miniature bearing puller**

No.1119

Windscreen Wiper Arm Removal Tool

Designed to work in confined spaces. This simple but effective tool is used to remove wiper arms, suitable for both straight and tapered spline spigots.

Reach: 1.1/8"(28mm)

Distance Between Jaws: 5/8"(16mm)

No.9611

Windscreen Wiper Arm Puller

Narrow jaws on this puller enable it to easily fit under wiper arms to remove them from the tapered spindle shaft.

Also used for removing battery terminals, alternator bearings etc.

Capacity: 0 to 2"(0 to 50mm)

Length: 4"(100mm)

No.1840

Universal Windscreen Wiper Arm Puller

Adjustable, thin two jaw puller is compact, light and easy to use:

prevents damaging wiper arm.

Special forcing screw cap is designed to protect wiper arms that feature a nozzle.

**No.1123
Twin Suction Cup**

Powerful multi-purpose dual 4.5/8"(120mm) diameter suction cups that have fantastic lifting power, ideal for lifting and manoeuvring flat or curved surface materials; such as windscreens, dented panels or any other smooth surfaced materials.

Suction Cups Diameter: 4.5/8"(120mm)
Overall Length: 15.1/2"(395)

**No.HC44
4.1/2" Suction Cup**

Multi-purpose 4.1/2"(115mm) diameter suction cup that has fantastic lifting power. Ideal for lifting and manoeuvring flat or curved surfaces, such as windscreens, body panels or any other smooth surface.

Suction Cup Diameter: 4.1/8" (120mm)

**Supplied as a set
of two pieces**

**No.HC22
2.1/4" Suction Cup Set**

Multi-purpose 2.1/4"(60mm) diameter suction cups that have fantastic lifting power, ideal for lifting and manoeuvring flat or curved surfaces, such as windscreens, body panels or any other smooth surface.

Supplied as a set of two per card.

**No.1121
Hand Vacuum Suction Cup**

Small rubber suction lifter cup that is ideal for light work on tiles, glass and other smooth surfaced materials. Simply depress on black handle to create suction.

Diameter: 3"(75mm)

**No.1122
Vacuum Suction Cup**

Multi-purpose 6"(150mm) diameter suction cup with fantastic lifting power.

Ideal for lifting and maneuvering flat or curved surfaced materials, such as windscreens, dented panels, or any smooth surfaced material. Made from high density rubber and steel. The handle swivels and flexes for easy use and can be used in conjunction with chains, jacks etc.

**No.1405
Abrasive Disc Trimmer**

Trims the worn edges off used abrasive discs allowing them to be reused. A nine inch disc can be trimmed four additional times before being discarded! Cuts either conventional round or multi-sided discs. Tool has compound guide for Speed Lock and conventional discs. Mounted on sturdy work board with full instructions printed on board.

**Suits Dzus Quick
Release Fasteners**

**No.4137
Dzus Coin Head Screwdriver**

This driver features a specially curved tip to fit Dzus and many other coin headed style screws where the slot has a concaved base. These style fasteners are found on body panels, cowls etc., on aircraft, trucks and special purpose vehicles.

Tip width: 9/16"(14mm) **Length:** 5"(125mm)

**No.1406
Disc Trimmer Tune Up Kit**

Kit consists of three important parts which may be required during the life of your #1405 Trimmer:
Cutter blade, rubber roller and roller pin.

**No.5726
Dzus Fastener Socket
(Cowl Fastener)**

Suits Dzus screw fasteners used to secure body panels, cowls, etc. on aircraft and special vehicles.

Drive size: 1/4" Square

Simply glue on adaptor
and attach slide hammer
for paint-less body
dent removal

No.1889 Multi Function Auto Body Dent Repair Set

First, clean the damaged surface. Apply the correct size adaptor with the glue gun to the damaged area. Allow up to five minutes for glue to cure. (Pouring cold water will speed up process) Attach slide hammer to the glued adaptor and remove dent. Finally use scraper to remove glue once the panel is repaired. Working from outer edges first and towards the centre is the best procedure. Supplied in blow mold case.

No.1584 "Hustler" Pogo-Stick

1.4 Metre leverage and alignment bar complete with chain and hooks. Used for aligning bumpers, panels, brackets etc. Pulls and repositions fenders and quarter panels. Two position brackets with rubber foot pad.

Chain Length:
72"(1830mm)

Bar Length:
52"(1330mm)

No.YC901

14lb. Knocker Panel Beaters Slide Hammer Puller Set

Made from heavy gauge steel featuring an all welded construction.

Set contains:

Huge 14lb. slide hammer
Claw hook
Short hook
Deep hook
Door edge tool
Hook & chain
Straight driver
Adaptor & screw
Supplied in blow mold storage case.

For individual parts refer to the table shown in YC900 Slide Hammer Kit listed below.

No.YC900

10lb Heavy-Duty Panel Beaters Slide Hammer Puller Kit

Features:

1. 10lb Slide hammer weight designed for in-line impact.
2. Includes ten of the latest engineered motor body pulling and pushing attachments.
3. Dual hammer action for reverse or direct reconstruction blows.
4. Quick assembly for applied hook-ups on fender edges, hoods and hood hinges, boot and boot hinges, headlights and many more applications.

No.YC902

5lb .Slide Hammer Kicker Set

This light weight 5lb. (2.3kg.) includes self tapping screws, curved hook and retaining screws for removing body dents from the outside by either punching or drilling hole in the deepest part of the dent.

No.1018

Body Dent Slide-Hammer Puller

Remove body dents from the outside by either punching or drilling a hole in the deepest part of the dent. Insert the hook or self threading screw & a few light raps with the 2.1/2lb(1.2kg) sliding hammer will return metal to its original shape. **Shaft size:** 1/2"UNC
Supplied with:

2 x Rethreading screws, 1/4" hook, and retaining chuck.

Thread size: 1/2"UNC

Length: 16"(405mm)

No.1018B

Body Dent Slide-Hammer Puller

Remove body dents from the outside by either punching or drilling a hole in the deepest part of the dent. Insert self threading screw & a few light raps with the 2.1/2lb(1.2kg) sliding hammer will return metal to its original shape. **Shaft size:** 11mm.

Supplied with:

3 x Rethreading screws and retaining chuck.

Thread size: 1/2"UNF

Length: 17.1/2"(445mm)

No.1865

Hydraulic Ram Puller

● Converts your Hydraulic ram for pulling applications

For use with 4 ton rams. Allows the use of your push ram for pulling applications with either 1/4" or 3/8" chain.

No.1805

Air Drill Key Keeper

● No more lost chuck keys!

Mounts between the drill body and air fitting.

Use with any 1/4", 3/8" or 1/2" chucks.

No.1546

Dent Puller Attachments

Four different sized sheet metal screws with 1/2" to 5/8"UNF.

Allows you to make your own heavy-duty body dent puller from any slide hammer with a 5/8"UNF shaft.

Package consists of four sheet metal

screws: 1/4"(6mm), 5/16"(8mm), 3/8"(10mm), 7/16"(11mm), 1/2"x5/8"UNF female adaptor.

No.1800

Spot Weld Cutter

Quickly removes spot welds on body panels etc.

No need to drill a centre hole, just simply centre punch the panel and place the retractable pilot point on the indent.

Can also cut small access holes. Has double ended 3/8"(10mm) six tooth

HSS blade, 1/4"(6mm) arbor with retractable pilot point.

Length: 3"(75mm)

No.1802

Spot Weld Cutter Blades

Package of three, 3/8"(10mm) double ended HSS cutting blades to suit #1800. Blades interchange with other spot weld arbors.

No.1803

Spot Weld Cutter Repair Kit

Maintenance kit for the #1800 Spot Weld Cutter. **Kit includes:** three replacement pilot pins and three springs.

No.1837
5 Ton Straight Jaw
Self-Tightening Clamp

Minimum size tapered jaws for working in tight places. Spring loaded centre screw allows one hand operation.

The round tapered wedge on the pull ring automatically tightens the jaws as force is applied.

The greater the force the tighter the jaws bite on the object being pulled.

Aggressive cross hatch tooth design.

Width of Jaws: 1.1/4"(32mm)

Capacity: 5 Ton

No.1838
6 Ton Straight Jaw
Self-Tightening Clamp

Self tightening, the harder it pulls, the tighter it grips.

The round tapered wedge on the pull ring automatically tightens the jaws as force is applied. The greater the force the tighter the jaws bite on the object being pulled.

Deep machine reverse tooth designed jaws.

Width of Jaws: 2.1/4"(58mm)

Capacity: 6 Ton

No.1839
6 Ton Flange
Head Self-Tightening Clamp

Self tightening, the harder it pulls, the tighter it grips. Features 1.1/2"(38mm) reach opening to fit around flanges, cowls, lips, pinch welds, etc. Butts against panels where only a narrow bite is available.

The round tapered wedge on the pull ring automatically tightens the jaws as force is applied.

Deep machine reverse tooth design jaws.

Width of Jaws: 1.7/16"(36mm)

Capacity: 6 Ton

No.1860
"The Iron Hand" Pulling Clamp

Iron hand adjusts to pull most rocker panels, door jambs and pillars. This wide flange tool also realigns floor jambs, rocker panels and pillars without additional damage to the vehicle.

The universal clamp is adaptable to many other applications as set out in the instructions.

No.1579
Multi Hole Pulling Post Plate

The multi hole pulling post plate bolts on to any standard frame at bumper bracket mounting holes to enable pulling screws and chains to be attached for pulling jobs and frame straightening.

Width: 3.1/2"(90mm)

Length: 12"(300mm)

No.1810
"The Original" Pull Rod Set

Every Pull Rod and Pick Pull is factory tested under a 500lb(230kg) load. Super tough alloy steel is precisely heat treated for maximum strength.

Vinyl coated handles are comfortable to use.

Use two at a time for maximum pulling.

Set Includes:

- 4 x Pull Rods, 2 x Pick Pulls
- 1 x Stainless steel straight edge
- 1 x HSS split point drill bit
- 1 x Instruction sheet

No.981
Sheet Metal Corner
Cutter
& Nozzle Shaping Tool

For cutting the "V" into the rolled edge of sheet metal to form a radius without any buckle or distortion.

This tool is also used for cutting and forming the correct "V" shape on caulking nozzle cartridges used for sealing windscreens.

V notched panel

Panel bent to shape

No.1888 Hood Holder

- Holds hood, bonnet, door & boot open during repair

To use, open hood or door and place large end of the column in a stable and stationary location, then position small telescoping rod on a secure spot under the hood. Extend telescoping rod to desired opening. Twist section to lock in position. Pressure of the hood or door secures hood holder in position.

Extends from 20" to 48" (500 to 1220mm) in length.

No.1881 Mini Dent Remover Puller

Compact and lightweight tool for pulling small dents such as dings, hail dents, light damage. Allows technician to "feel the pull" reducing over pull on light damage.

Use with any welding stud 1.9 - 2.8 mm

Do you burn through thin panels?

Weld does not stick to copper alloy backing plate!

No.333 Plug Weld Locking Pliers

This tool helps to prevent the burn through whilst welding the two panel seams together. The copper alloy head helps with the heat distribute and the weld does not stick to it!

Length: 9" (230mm)

No.1855 Air Guard Manifold

- 1 Inlet - 5 Outlets

Now there is no need to switch one hose from tool to tool as you work. Your air tools are ready to use when you need them. "Air Guard" protects air fittings whilst laying on the floor. Made of light weight aluminium.

Orifice sizes: 1/4"NPT Body: 7.1/2" x 7" (190 x 180mm)

Note: Airline fittings are not included

No.1007 Headlight Spring Remover Tool

Removes and installs headlight adjusting springs.

Length: 6.1/2" (165mm)

No.1505 Wool Bonnet Cleaning Tool

This tool quickly fluffs and restores impregnated bonnets, extending their useful working life. Simply run the tool over rotating wool bonnet.

No.1883 Bonnet & Boot Holder Clamp

Used on vehicles with weak gas strut lifts on bonnets, tailgates, hatches and boots. Clamp securely holds weak lift supports in the extended position to allow access to the engine compartment or luggage area.

Place the tool on the lift rod next to cylinder body.

Tighten with knob until it is secure on lift rod, when finished simply remove the tool.

No.1815 "Mighty Midget" Panel Clamps

A card of five clamps. Use clamps to hold panels in place for welding. Small profile allows door to be closed for alignment check before welding.

Compact size allows for a multitude of uses. Constructed from heat treated high carbon steel

**Spray on card to
match colour of vehicle**

No.1895 Magnetic Colour Card

The surface of the magnetic colour matching card has a special coating to protect against the use of thinners which enables you to wipe it clean after use. Paint can also be allowed to dry and then be peeled off. Spray colour on surface and attach on vehicle to view colour match from any angle.

No.1806 Measure 'N' Stick Auto Body Tape

- Hook It - Pull It - Stick it ● Hands free measuring
- Measure without an assistant

Features a special "Tee" tip that hooks on and fits into small holes with a three way sliding hole clip on case for hole-to-hole measurements. Powerful magnets on four sides with metric and inch graduations on both sides. It's a real time saver for the panel beater. **Length: 16feet (5m)**

No.1807 Measure 'N' Stick Accessory Kit

- **Magna-Bridge, 4" & 8" Riser**

Magna-Bridge straddles studs, bolt heads, attaches to wheel caps, spindles etc. to provide starting hole for the "Tee" tip of Measure 'N' Stick. Both 4" and 8" Risers fit onto Magna-Bridge to measure over obstructions.

No.1501 Disposable Plastic Paint Cup

Made from strong durable plastic. Features graduated translucent body for easy mixing and measuring. Fits most siphon feed spray guns. **Capacity: 1 Quart (1.1Litre)**

No.1500 3Pc. Paint Strainer Set

Fast method for straining paint, utilizes copper mesh to strain particles from lacquer, enamel, varnish, solvents etc. Total filtration for true colour matching.

No.1502 Spray Gun Paint Strainer

Locks onto pick-up tube on most spray guns. Copper filter strains particles from lacquer, enamel, varnish, solvents etc. Prevents undissolved pigments from spoiling paintwork and gives total filtration for true colour matching. Reusable and easy to clean. Comes in a display box of 12.

No.1503 Double Blade Paint Mixer

Double bladed design for mixing paint and many other fluids. Made from zinc plated steel. **Length: 14"(355mm)**

No.1504 Spray Pot Lid

Fits spray gun pots. A useful accessory to stop contamination of part-empty or full pots. Fits all siphon spray gun cups.

No.1819 "Gun Slinger" Spray Gun Hangers

- Convenient when painter needs hands free.
- Mounts in your spray booth
- Holds siphon feed or gravity feed guns

Package includes two hangers.

No.1880

32 Pc. Paintless Dent Repair Tool Kit

Hail damage, door dings and other cosmetic damage are quickly massaged out with this extensive 32 tool profit center. Supplied with complete instruction booklet.
